Introduction

Alberta Vital Statistics annually publishes this comprehensive summary of vital events which occur in the Province of Alberta in 1986 as of March 1987.

The statistics presented in this Annual Review are compiled from the events registered in the Vital Statistics Information Terminal System. It is primarily for the purpose of providing a ready reference to some of the more frequently used Vital statistics for Alberta. It has only a minimum of an analysis and interpretation of the data.

I wish to recognize my staff from their excellent assistance in compiling this review.

A handwritten signature in cursive script that reads "Bill Gilroy". The signature is fluid and elegant, with a prominent "B" and "G".

GLOSSARY OF TERMS

Vital Statistics:	Records dealing with births, deaths and marriages; all events which have to do with an individual's entrance into or departure from life, together with changes in civil status.
Live Birth:	A complete expulsion or extraction from the mother, irrespective of the duration of the pregnancy, of a fetus in which, after expulsion or extraction, there is breathing, beating of the heart, pulsation of the umbilical cord or definite movement of a voluntary muscle, whether or not the umbilical cord has been cut or the placenta is attached.
Stillbirth:	Fetal death of at least 20 weeks gestation or 500 grams weight.
Gestation:	Time between the conception and birth of an infant, the usual length being 40 weeks.
In-Wedlock:	For purpose of this report, in-wedlock means that the parents of the child are married to each other at the time of the birth, or are subsequently married and have changed the birth registration.
Birth Order:	Number of live births to the mother, including this birth.
Infant Death:	Death of a child between birth and one year of age.
Neonatal Death:	Death of an infant 28 days of age or less.
Natural Increase:	Excess of births over deaths.
